PROFILE

Passionate professional with more than 7 years of experience in web development. I believe that curiosity and responsibility are essential to success. I place a high value on code review, clean code, and collaboration. I believe that teamwork is a key to achieving exceptional results.

WORK EXPERIENCE

Senior Frontend developer

Grid Dynamics (1000-5000 employees, 09.2024 – now
outsource, outstaff)

Developing vehicle parts website for GPC automotive with micro frontends and SSR

Tech stack:

React, React Context, Zustand, Apollo Client, Typescript, Storybook, Webpack module federation, Vite, SSR, GCP cloud

Achievements:

Proposed and successfully integrated improvements in communication between developers that increased velocity by approximately 20%

Senior Frontend Developer

ITRex (200-500 employees, outsource, 02.2024 – 07.2024
outstaff)

Developing healthcare app Noom, create and integrate a new Noom Vibe app, run several simultaneous experiments

Tech stack:

React, React Context, Redux, React Query, Typescript, Storybook, Github Actions, AWS, Yarn, Django, MySQL, PostgreSQL

Senior Frontend Leaning

German Standard (50-100 employees, 05.2023 – 02.2024
outsource, outstaff)

Developing apartment renting website with Contentstack CMS, RentCafe API

Tech stack:

Next, React Context, SWR, Zustand, Typescript, React Hook Form, Storybook, Contentstack CMS, Github Actions, pnpm, Turbo, Vercel

WORK EXPERIENCE

Front-end developer

ITRex (200-500 employees, outsource, outstaff)

09.2022 – 06.2023

Developing a car leasing website with micro-frontends, migrating from AWS to Vercel, writing e2e tests, and improving observability

Tech stack:

Next, Apollo Client, Typescript, React Hook Form, Storybook, Cypress, Node, i18n, RxJS, GitHub Actions, Yarn, Turbo, Vercel cloud, AWS lambdas

Achievements:

Designed and implemented full e2e test coverage in 1 month, improving test reliability and reducing regression bugs by 80%

Full-stack developer (Frontend Leaning)

ITRex

04.2022 – 09.2022

IoT cloud infrastructure. Design and develop the IoT cloud infrastructure for connecting web- and mobile- based applications with thousands of installed devices in real-life (in-store) such as laundry machines and POS terminals

Tech stack:

React, Redux, Typescript, Javascript, Node(Express, Nest), PostgreSQL, Mongo, Redis, RabbitMQ, AWS

Mentor, software developer

Devincubator (5-10 employees, startup)

10.2018 – 12.2022

Mentoring and internal projects development. Guiding groups on .NET and React, creating tailored study plans, developing assessment system. Prepare students for interviews. Offer consulting services on technology best practices.

Tech stack:

React, Redux, Typescript, Javascript, Rebass, Nodejs(Expressjs, Nestjs), PostgreSQL, Mongo, Redis, RabbitMQ, AWS

Software developer (Frontend Leaning)

CactusSoft (50-100 employees, outsource, outstaff)

02.2021 – 05.2022

Different MVPs and startups. Several projects in various domains: e-learning through gamification (a Microsoft Teams-based product utilizing a number of Microsoft products), Healthcare, E- learning, AI engineering automation. Configuring pipelines for the front-end on Azure, GitLab, and AWS

Tech stack:

React, Redux, Typescript, Apollo, GraphQL, Hasura, Node.js, Emotion, React Table, Chakra-UI, Material-UI, OIDC, OAuth2, Auth0, I18next, Azure, Gitlab, Websocket, PostgreSQL

Achievements:

Integrated Hasura with graphql in Azure pipeline in a week

Software developer (Frontend Leaning)

CTDev, C.T.Co (500-1000 employees, outsource)

05.2019 – 02.2021

Developing internal tools with React and Angular, micro-services and BFF in node for a Forbes 500 Swiss re-insurance company

Tech stack:

React, Redux, TypeScript, CSS-in-JS, GraphQL, Apollo, Node.js, Koa.js, i18next

Achievements:

Wrote bff in a month, migrated the most important parts from Angular to React in a short time
