Poland, Warsaw

SKILLS

Front-end: React, Next.js, TypeScript, Apollo/GraphQL, Zustand, Redux

Back-end: Node.js (NestJS, Express, Koa), PostgreSQL, MongoDB, Hasura

Cloud & DevOps: AWS, GCP, Vercel, Docker, CI/CD (GitHub Actions)

AI tools: Cursor, Claude, Gemini

EDUCATION

- BNTU, Specialist Degree in Civil Engineering, 2007–2012
- Computer Academy "IT Step", Software Development, 2015–2017

ADDITIONAL TRAINING

- EPAM, Node.js (2020)
- EPAM, Node.js in AWS (2020)

LANGUAGES

English C1

Polish A2

Russian Native

PROFILE

Frontend-leaning senior software engineer with 8+ years of experience building scalable web applications with React, TypeScript, and Node.js across e-commerce, healthcare, IoT, and internal platforms. I value continuous learning, clear communication, and collaborative work that leads to high-quality outcomes.

WORK EXPERIENCE

Senior Frontend Developer

Grid Dynamics   09.2024 – present
(1000-5000 employees, outsource, outstaff)

- Delivered a scalable SSR e-commerce platform for vehicle parts used across multiple teams, working across frontend architecture and backend integrations, utilizing React, Zustand, TypeScript, Apollo Client, and Webpack Module Federation for micro-frontends.
- Improved team development velocity by ~20% through workflow and collaboration improvements.
- **Achievement:** Increased delivery speed by adopting AI-assisted engineering workflows in day-to-day development.

Senior Frontend Developer (Full-Stack Developer)

ITRex   04.2022 – 07.2024
(200-500 employees, outsource, outstaff)

Noom (Healthcare)
- Delivered the Noom Vibe app integration and engineered simultaneous A/B experiments using React, Redux, React Query, and Python/Django.
- **Achievement:** Took ownership beyond the frontend scope by ramping up in Django and shipping the required backend changes independently.

Car Leasing App
- Built micro-frontends with Next.js and Apollo and supported the migration from AWS to Vercel, contributing to the platform modernization effort.
- Reduced regression bugs by 80% within 1 month by introducing end-to-end test coverage.

IoT Cloud Infrastructure
- Built products supporting thousands of connected devices in production, including laundry machines and POS terminals.
- Contributed across frontend and backend to deliver reliable cloud-based IoT functionality at scale.

WORK EXPERIENCE

Senior Frontend Developer (Full-Stack Developer)

05.2023 – 02.2024

German Standard (50-100 employees, outsource, outstaff)

- Worked on a scalable apartment rental platform integrating Contentstack CMS and the RentCafe API, contributing to a product that combined dynamic content management with external rental platform data.
- Configured a modern delivery pipeline using GitHub Actions, pnpm, Turborepo, and Vercel, improving deployment consistency and making the engineering workflow more efficient.

- **Achievement:** Built a custom package that aligned the Contentstack CMS model with frontend requirements, simplifying integration, reducing manual transformation logic, and making CMS-driven development faster.

Mentor, software developer

10.2018 – 12.2022

Devincubator (5-10 employees, startup)

- Combined engineering work with mentorship by building internal projects, guiding students learning .NET and React, creating study plans, developing assessment tools, and helping people prepare for interviews.
- Helped more than 50 junior developers successfully land their first jobs through mentorship, interview preparation, and structured learning support.

Software developer

02.2021 – 05.2022

CactusSoft (50-100 employees, outsource, outstaff)

- Worked on multiple MVPs and startup products across several domains, including e-learning through gamification, healthcare, and AI engineering automation. In parallel with feature development, I configured frontend delivery pipelines across Azure, GitLab, and AWS

- **Achievement:** Integrated Hasura with GraphQL into the Azure pipeline in just one week, helping the team move faster with backend integration

Software developer

05.2019 – 02.2021

CTDev, C.T.Co (500-1000 employees, outsource)

- Built internal tools for a Fortune 500 Swiss reinsurance company using React, Angular, and Node.js, with work spanning microservices and backend-for-frontend architecture.
- Delivered a BFF in one month and contributed to the quick migration of core product areas from Angular to React.
